Lab 2 - SECTION A, BATCH 1 Date: 15 th Nov 2021

EXER: Descriptive Analytics and Visualization

The data file bollywood.csv contains box office collection and social media promotion information about movies released in 2013–2015 period. Following are the columns and their descriptions.:

- 1. SlNo
- 2. Release Date
- 3. MovieName Name of the movie
- 4. ReleaseTime Mentions special time of release. LW (Long weekend), FS (Festive Season), HS (Holiday Season), N (Normal)
- 5. Genre Genre of the film such as Romance, Thriller, Action, Comedy, etc
- 6. Budget Movie creation budget
- 7. BoxOfficeCollection Box office collection
- 8. YoutubeViews Number of views of the YouTube trailers
- 9. YoutubeLikes Number of likes of the YouTube trailers
- 10. YoutubeDislikes Number of dislikes of the YouTube trailers

Use Python code to answer the following questions:

- 1. How many records are present in the dataset?
- 2. How many movies got released in each genre? Sort number of releases in each genre in descending order.
- 3. Which genre had highest number of releases?
- 4. How many movies in each genre got released in different release times like long weekend, festive season, etc. (Note: Do a cross tabulation between Genre and ReleaseTime.)
- 5. Which month of the year, maximum number movie releases are seen? (Note: Extract a new column called month from ReleaseDate column.)
- 6. Which month of the year typically sees most releases of high budgeted movies, that is, movies with budget of 25 crore or more?
- 7. Which are the top 10 movies with maximum return on investment (ROI)? Calculate return on investment (ROI) as (BoxOfficeCollection Budget) / Budget.
- 8. Do the movies have higher ROI if they get released on festive seasons or long weekend? Calculate the average ROI for different release times.
- 9. Is there a correlation between box office collection and YouTube likes? Is the correlation positive or negative?
- 10. Which genre of movies typically sees more YouTube likes? Draw boxplots for each genre of movies to compare.
- 11. Which of the variables among Budget, BoxOfficeCollection, YoutubeView, YoutubeLikes, YoutubeDislikes are
 - highly correlated? Note: Draw pair plot or heatmap.

 During 2012–2015 period highlight the genera of maying and their hay office.
- 12. During 2013–2015 period, highlight the genre of movies and their box office collection? Visualize with best fit graph.
- 13. Visualize the Budget and Box office collection based on Genre.
- 14. Find the distribution of movie budget for every Genre.
- 15. During 2013–2015, find the number of movies released in every year. Also, visualize with best fit graph.
